THE FUTURES OF AI

Implications for Europe's R&I Ecosystem

Foresight
On Demand

Uncertainty, uneven adoption, and global competition are defining how AI evolves across different sectors.

Three Opportunites for Action ›

Strengthening anticipatory governance capacities.

AI is and remains a moving target. Policymaking needs to build the capacity to act, adapt and revise under conditions of ongoing uncertainty.

Broader and deeper AI adoption across sectors.

Leadership in AI will not necessarily come from developing the most advanced models but from the ability to deploy, integrate and apply AI effectively across sectors.

Shaping a European pathway for AI

The EU needs to articulate its own approach, grounded in trustworthiness, robustness, sustainability and high-quality infrastructures.
